Software Engineer | AWS Certified Developer & ML Engineer

SUMMARY

Software Engineer and AWS Certified Developer with 3+ years of experience building reliable, automated systems and scalable backend infrastructure. Specialist in Python and cloud-native architecture, with a focus on data integrity, telemetry, and diagnosability. Currently pursuing an MSc in Computer Science (AI) to engineer resilient, intelligent platforms that optimize complex technical workflows and system delivery.

SKILLS

Infrastructure & Cloud: AWS (EC2, Lambda, S3, Redshift), Docker, Kubernetes, CI/CD, Git, RESTful APIs, Web Security

Languages & Frameworks: Python (Expert), SQL (PostgreSQL, MySQL), Java, C/C++ (Data Structures), Node.js, FastAPI, Django Rest Framework

Systems & Quality: Automated Regression Testing, Telemetry & Instrumentation, Observability, Event-Driven Architecture, Win32 API exposure

EDUCATION

The University of Toledo, MSc. Computer Science (concentration in AI)

Toledo, OH (Expected May 2026)

Softwarica College of IT and E-Commerce, BSc. (Hons) in Computing

Kathmandu, Nepal (2019 - 2022)

PROJECTS

Agent-Orchestrated Adaptive RAG for DevOps Knowledge Base

- Developed a multi-agent system using LangChain that classifies intent to automate complex infrastructure workflows, ensuring high-fidelity retrieval of technical specifications.
- Engineered a router to solve "retrieval blindness" in high-velocity environments, directing queries to specialized namespaces for precise troubleshooting and system support.
- Implemented rigorous evaluation loops and Self-RAG techniques to maintain data freshness and reliability, reducing manual overhead in critical production environments.

Intelligent Data Modeling & Automated Ingestion

- Built a scalable pipeline featuring automated text extraction and VectorDB indexing to transform unstructured technical documentation into structured, queryable data sets.
- Optimized system performance by implementing hybrid search to handle complex domain terminology, ensuring high accuracy for cross-functional technical discovery.

EXPERIENCE

Software Engineer | DigiTechnology Nepal

Aug 2022 – July 2024

- Architected core backend services supporting **1,000+ concurrent users**, prioritizing fault tolerance, extensibility, and data integrity for mission-critical operations.
- Designed high-performance internal dashboards and telemetry tools, providing real-time observability and actionable metrics into system health and usage patterns.
- Optimized **RESTful API endpoints** and CI/CD workflows, boosting integration efficiency and system response times by **40%** while ensuring zero-downtime deployments.
- Collaborated with stakeholders to determine back-end dependencies and iterate on product features, balancing technical craft with the need for reliable, maintainable code.

Software Developer | Kaii Group

Aug 2021 – July 2022

- Engineered robust backend services using **Django Rest Framework**, implementing comprehensive **regression testing** to ensure feature stability across deployment cycles.
- Developed an **automated data processing and ingestion tool**, improving workflow efficiency by 30% and eliminating manual intervention in the data lifecycle.
- Collaborated cross-functionally to build secure CRM software with role-based access control, ensuring robust data structures and compliance with security requirements.
- Conducted extensive system debugging and performance tuning, identifying and resolving critical bottlenecks to ensure the reliability of core infrastructure services.

CERTIFICATIONS

AWS Certified Developer – Associate | Amazon Web Services

(March 2025)

AWS Certified Machine Learning Engineer – Associate | Amazon Web Services

(August 2025)
